Customer savings resulting from Sonoma Clean Power, a Community Choice entity

$62 MILLION

8-FOLD INCREASE
In money invested locally using clean energy funds generated through Sonoma Clean Power

Community Choice is a local program that buys and generates electricity for business and residents. It introduces competition and choice into the electricity market with a focus on local, renewable energy to stimulate rapid innovations in clean energy systems. As local non-profit entities, Community Choice energy providers are not beholden to increasing shareholder returns, but rather to stable, competitive pricing for consumers and increasingly resilient, clean, and local energy systems.

LOCAL JOBS+
CLEAN POWER
MADE EASY!

HOW IT WORKS:

With Community Choice Energy, the community purchases clean electrical power, increasing stability through local control of electric rates, and developing energy projects that create jobs.

$600,000
Refund checks to solar customers including about $70,000 to schools
Flip the Switch for Clean Energy and Local Jobs

With Community Choice Energy, individuals can make a real GLOBAL difference toward saving this planet for future generations.

48% Reduction in greenhouse gas emissions from electricity through Sonoma Clean Power

2.5 MILLION Population currently served by Community Choice Energy in California

Operational Community Choice Energy entities now include:

- Sonoma
- Lancaster
- San Francisco
- San Mateo County

Community Choice Energy efforts are underway in:

- Silicon Valley
- Monterey Bay
- Contra Costa County
- Alameda County
- Humboldt County
- San Diego County

Public discussions of Community Choice Energy are occurring from Yolo County to San Luis Obispo and from Arcata to Oakland.

Community Choice Energy, or Community Choice Aggregation (CCA) is a government body created by a county, city or combination as a joint powers authority. A CCA can purchase electricity, set rates, sell revenue bonds and build energy-generating facilities. PG&E continues to provide customer service, maintain the power lines, transmit power and handle billing. Community Choice Aggregation is enabled by California legislation passed in 2002.
